品质卓越是永恒的主题  
QUALITY EXCELLENCE IS THE ETERNAL THEME

永达玻璃钢专业环保设备供应商  
诚实守信 创新超越 以客为尊 互利双赢

## All Size Acid Material FRP Storage Tank For Chemical Production Line

Our Product Introduction

### Basic Information

- Place of Origin: ShanDong province, CHINA
- Brand Name: YONGDA
- Model Number: Customized
- Minimum Order Quantity: one square meter ,to be negotiated
- Price: \$8-40 per square meter USD 8-40 /per meter ,to be negotiated
- Packaging Details: nude packing or bundled TEU or FR TEU ,to be negotiated
- Delivery Time: 15 days To be negotiated according order
- Payment Terms: L/C, T/T, Western Union
- Supply Ability: 1000 square meters per week

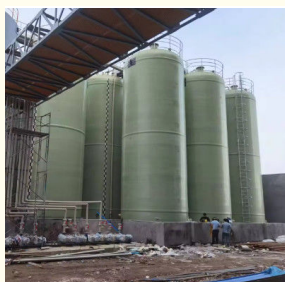

### Product Specification

- Application: Drinking Water Storage Tanks Chemical Storage Tanks
- Color: Customized Color
- Key Words: FRP Storage Tank
- Shape: Round Shape Or Customized
- Highlight: acid frp storage tank , acid frp electrolytic cells, chemical frp storage tank

## Product Description

Made in china wholesale all size frp acid material storage tank for chemical production line

### Key attribute

### Industry-specific attribute

Application	Industry,commercial,etc
technique	Filament wilding

### Other attribute

Dimension	customized
Surface Treatment	smooth ,customized
Marketing Type	Hot Product 2024
core components	FRP pressure tank Body
feature	Accept customization
color	white,grey,or customized
material	Fiber Reinforced Plastic ,FRP
Brand Name	YongDa
product name	FRP GRP storage Tank
place of origin	Shandong province,CHINA
capacity	customized
fluid medium	water ,juice ,liquid,or negotiate

### Packaging and delivery

packaging Details	bundled,nude,as otrder
port	QingDao or Customized

### Supply Ability

selling units	single set
single package size	based on orders
Single gross weight	based on orders
Supply Ability	10 Sets per Week

### Lead time

quantity(sets)	10	10
Lead time(days)	15	To be negotiated

### Customization

#### Customized logo

Min. order: 1

#### Customized... packaging

Min. order: 1

#### Graphic... customization

Min. order: 1

## Production Description

FRP tanks are mainly a new type of composite material made of glass fiber as a reinforcing agent and resin as a binder, wound by a microcomputer controlled machine. Fiberglass storage tanks are corrosion-resistant, high-strength, light-weight, and long-life. Because they also have the characteristics of flexible design and strong craftsmanship, they can be flexibly designed and used in different industries such as: chemical industry, environmental protection, food, pharmaceuticals, etc.

In the industry, it is gradually replacing carbon steel and stainless steel in most market areas. Media that fiberglass storage tanks can store:

(1) Inorganic acids: (dilute sulfuric acid, dilute nitric acid, hydrochloric acid, phosphoric acid, hydrofluoric acid, hydrobromic acid, hypochlorous acid, silicic acid, nitrous acid, sulfurous acid, carbonic acid, fluorosilicic acid, fluoroboric acid, etc.).

(2) Organic acids: (formic acid, acetic acid, propionic acid, crotonic acid, lauric acid, fatty acid, lactic acid, glycolic acid, peracetic acid, oxalic acid, malonic acid, succinic acid, maleic acid, malic acid, tartaric acid, Phthalic acid, etc.).

(3) Alkalis and hydroxides: (sodium hydroxide, potassium hydroxide, ammonium hydroxide, calcium hydroxide, magnesium hydroxide, barium hydroxide, aluminum hydroxide, iron hydroxide, ammonium sulfate, ammonium nitrate, ammonium carbonate, ammonium nitrate, ammonium phosphate, ammonium persulfate, ammonium chloride, sodium silicate, potassium hypochlorite, aluminum carbonate, aluminum nitrate, aluminum sulfate, potassium acetate, potassium formate, potassium, copper sulfate, copper nitrate, alum, calcium carbonate, etc. wait). (4) Other elemental compounds, industrial liquids and products, food and vegetable oils, atmosphere, water, soil (soap, detergent, sulfur lime, bleaching liquid, ink, latex, starch, gelatin, animal oil, rosin, nicotine, vinegar, yeast, wine, sea water, salt water, high purity water, acidic mineral water, sewage, soil, etc.).

## Company Profile

Weifang Yongda FRP Co., Ltd. was founded in 2009, is a professional engaged in glass fiber reinforced thermosetting plastic and other new composite materials research and development, production, sales, service, a comprehensive scale of four-in-one enterprise!

The company's main products: FRP pipes, pipe fittings, FRP purification tower series, biological deodorization filter tank, environmental protection equipment, exhaust gas treatment system, activated carbon adsorption tank, septic tank, cooling tower series, storage tanks, equipment tanks, aquaculture equipment, equipment shrouds, and to undertake anticorrosive engineering, thermal insulation engineering, VOCs purification project.

## Why Choose Us

## FAQ

**Q1: What is your company name?**  
WeiFang YongDa FRP Co., Ltd

**Q2: Are you a factory or a trading company?**  
We are a factory and a professional manufacturer of FRP products. We have more than 50 skilled technicians. In addition, we have professional mold engineers for design and production.

**Q3: Where is your factory? How can I visit you?**  
West side of the road about 3 kilometers north of Wenhe Bridge Toll Station on National Highway 206, Ying qiu Town, Chang Le County, Weifang City, Shandong Province, China.If you come to our factory, I will arrange a pick-up for you so that we can meet up faster.

**Q4: How can you guarantee the product quality?**  
We have the quality control system ISO9001:2015, and it's been followed strictly. We also have the professional QC team, and each our package worker will be in charge of the final inspection according to the QC instruction before packing.

**Q5: Can you do OEM for me?**  
We accept all OEM orders, just contact us and give me your design,we will offer you a reasonable price ASAP.

**Q6: What payment methods do you support?**  
T/T, L/C. western union

## Production Description

Fiberglass reinforced plastic (FRP) is widely used in industries such as chlor alkali, metallurgy, pharmaceuticals, fermentation and brewing, potassium fertilizer, and compound fertilizer (NPK) due to its light weight, high strength, wide corrosion resistance, and flexible design. Our company has comprehensively, reasonably, and effectively utilized the excellent performance of FRP in the design and manufacturing of containers and tower equipment.

Tower equipment is designed to meet the requirements of different corrosive media by changing the material of the inner lining layer and lining, or by changing the types of resin and fibers; Through finite element analysis, changing the resin and fiber types of the structural layer and adjusting the laying method can meet the strength requirements under corresponding temperature and pressure.

✓ Oil sector

✓ Chemical industry

✓ Food sector

✓ Pharmaceutical sector

✓ Environmental protection field

✓ Printing and dyeing industry
