QUALITY EXCELLENCE IS THE ETERNAL THEME

永达玻璃钢专业环保设备供应商
诚实守信 创新超越 以客为尊 互利双赢

Industrial Chemical FRP GRP Glass Vertical Storage Tank Professional Liquid Tank

Our Product Introduction

Basic Information

- Place of Origin: ShanDong province, CHINA
- Brand Name: YONGDA
- Model Number: Customized
- Minimum Order Quantity: one set ,to be negotiated
- Price: \$400-1000per set USD 400 -1000 /per set ,to be negotiated
- Packaging Details: nude packing or bundled TEU or FR TEU ,to be negotiated
- Delivery Time: 15 days To be negotiated according order
- Payment Terms: L/C, T/T, Western Union
- Supply Ability: 1000 sets one year

Product Specification

- Application: Industry ,commercial,widely
- Technique: Filament Winding
- Surface Treatment: Smooth Glossy
- Product Name: Frp Tank Vessel
- Shape: Round,vertical
- Advantage: Higher Strength Light Weight
- Highlight: **chemical vertical storage tank, chemical horizontal storage tank, frp vertical storage tank**

Product Description

Industrial chemical commercial FRP GRP Glass Fiber Reinforced Plastic Vertical Storage Tank professional liquid tank

Key attribute

Industry-specific attribute

Application	Manufacturing Plant, Other,etc
techinque	Filament wilding

Other attribute

Dimension	customized
Surface Treatment	smooth ,customized
Marketing Type	Hot Product 2024
core components	frp Pressure vessel
feature	liquid storage tank
color	green,grey,or customized
material	Fiber Reinforced Plastic ,FRP
Brand Name	YongDa
product name	Frp vertical tank
place of origin	Shandong province,CHINA
capacity	customized
fluid medium	liquid ,water,acid,oil,gas ,etc

Packaging and delivery

packaging Details	bundled,nude,as order
port	QingDao or Customized

Supply Ability

selling units	single set
single package size	based on orders
Single gross weight	based on orders
Supply Ability	10 Sets per Week

Lead time

quantity(sets)	10	10
Lead time(days)	15	To be negotiated

Production Description

FRP Vertical storage tank

FRP storage tank is a kind of FRP products, which is mainly a new type of composite material made of glass fiber as a reinforcing agent, resin as a binder, and wound by a microcomputer controlled machine. FRP storage tanks are corrosion-resistant, high-strength, light-weight, and long-life. Because of their flexible design and strong manufacturability, they can be flexibly designed and used in different industries, such as: chemical, environmental protection, food, pharmaceuticals In other industries, it is gradually replacing most of the market areas of carbon steel and stainless steel.

Company Profile

Weifang Yongda FRP Co., Ltd. was founded in 2009, is a professional engaged in glass fiber reinforced thermosetting plastic and other new composite materials research and development, production, sales, service, a comprehensive scale of four-in-one enterprise!

The company's main products: FRP pipes, pipe fittings, FRP purification tower series, biological deodorization filter tank, environmental protection equipment, exhaust gas treatment system, activated carbon adsorption tank, septic tank, cooling tower series, storage tanks, equipment tanks, aquaculture equipment, equipment shrouds, and to undertake anticorrosive engineering, thermal insulation engineering, VOCs purification project.

Why Choose Us

FAQ

Q1: What is your company name?
WeiFang YongDa FRP Co., Ltd

Q2: Are you a factory or a trading company?
We are a factory and a professional manufacturer of FRP products. We have more than 50 skilled technicians. In addition, we have professional mold engineers for design and production.

Q3: Where is your factory? How can I visit you?
West side of the road about 3 kilometers north of Wenhe Bridge Toll Station on National Highway 206, Ying qiu Town, Chang Le County, Weifang City, Shandong Province, China.If you come to our factory, I will arrange a pick-up for you so that we can meet up faster.

Q4: How can you guarantee the product quality?
We have the quality control system ISO9001:2015, and it's been followed strictly. We also have the professional QC team, and each our package worker will be in charge of the final inspection according to the QC instruction before packing.

Q5: Can you do OEM for me?
We accept all OEM orders, just contact us and give me your design,we will offer you a reasonable price ASAP.

Q6: What payment methods do you support?
T/T, L/C. western union

Production Description

FRP Food brewing tank

FRP equipment is an important fermentation equipment in the brewing industry because of its good corrosion resistance, light weight, high strength, and environmental protection. The food-grade resin used by our company is non-toxic, tasteless, safe and hygienic. The glass fiber reinforced plastic fermentation tanks produced are widely used in various brewing enterprises with good design and technology.

1**Meet the requirements of food hygiene.**

The glass fiber reinforced plastic fermentation tank is lined with food grade resin, and the product meets the hygienic requirements, and is non-toxic and tasteless.

2**Lightweight and high strength.**

The specific gravity of FRP is only 1.4-2.0, while the tensile strength of fiber-wound FRP can reach 300-500Mpa, which exceeds the ultimate strength of ordinary steel and has reached or exceeded some special alloy steels.

3**Good construction technology.**

Uncured resins and reinforcing materials have the ability to change shapes, so they can be easily processed into desired shapes through different molding methods and molds. This feature is suitable for large-scale, integral and complex equipment and construction requirements.

4**Excellent corrosion resistance.**

One of the characteristics of FRP is good corrosion resistance and long service life. Through the choice of various types and grades of resins, FRP can withstand a variety of acids, alkalis, salts and organic solvents.

5**Good surface performance**

Because the glass is integrally formed, there are no joints, and the inner wall is smooth. When in contact with chemical media, the surface will not produce corrosion products and scale, let alone breed bacteria and microorganisms. Therefore, it does not pollute the medium and is easy to clean, so FRP is very suitable for food brewing and pharmaceutical industries.
