Production Description

Currently, FRP Waste Gas Purification Absorption Tower has been successfully used to deal with spraying waste gas, printing waste gas, chemical waste gas, electronic waste gas, medical waste gas, asphalt waste gas, mechanical exhaust, sewage

waste gas, etc. And it also has a great success in meeting the national discharge standard. At the same time, it removes odour and improves the environment. It is especially suitable for the waste gas which is of low dust capacity, low concentration and great peculiar smell.

The FRP Waste Gas Purification Absorption Tower is mainly composed of Water tank, Circulating water, Packing layer, Spraying system, Demister etc. This machine aims at separating gas from the contaminant and translating into innocuous substance and then cleaning gas. The waste gas intakes to the purifying column through the air hose, after packing, the waste gas and absorption liquid are completely contacted and have a neutral reaction. After purified, the waste gas discharges into the environment after demisting and dehydration, its motivation is draught fan.
